Chennai, TamilNadu

PROFILE SUMMARY

MERN Stack Developer with 2+ years of experience designing and developing dynamic, scalable web applications using MongoDB, Express.js, React.js, and Node.js. Proven track record building reusable UI components, RESTful APIs, and end-to-end features across frontend and backend for production-grade applications. Skilled in state management, authentication, database integration, and performance optimization, with cloud deployment experience on Azure and AWS and consistent delivery in Agile, cross-functional teams.

CORE SKILLS

FRONTEND: JavaScript, React.js, TypeScript, Context API, React Router, Material UI, HTML5/CSS3

BACKEND: Node.js, Express.js, RESTful APIs, JWT Authentication, Nodemailer

DATABASE & CLOUD: MongoDB, SQL, Azure (App Service, Blob Storage, Cosmos DB), AWS

TOOLS: Git, Azure DevOps, VS Code, Postman

PROFESSIONAL EXPERIENCE

Associate Software Engineer | Bangalore, India

March 2024 – Present

- Architected and delivered a full-stack MERN application supporting internal field operations, integrating RESTful APIs (Node.js, Express.js) with Postman-validated testing for seamless frontend-backend communication
- Developed reusable React components adopted across multiple application modules, reducing UI development time and ensuring design consistency
- Optimized database queries by implementing efficient filtering, pagination, and selective data retrieval, improving application responsiveness.
- Enforced JWT-based authentication and role-based access control (RBAC) across all application routes, integrating Axios, Mongoose, and React Router to extend functionality and ensure secure, permission-based access
- Collaborated with product owners and business analysts in Agile sprints (Jira, daily stand-ups) following Git branching and peer code review practices
- Integrated CI/CD pipelines on Azure, enabling automated builds and zero-downtime deployments for production releases

PROJECT EXPERIENCE

Smart Worker Suite

2024 – 2026

- Architected an interactive drag-and-drop workflow builder using React Flow, enabling users to visually design, configure, and manage reusable workflow components
- Built core business modules — User Management, License Management, Billing & Invoicing, and Reporting — with pagination, search, filtering, PDF generation via React PDF, and automated email notifications using Nodemailer
- Developed responsive React.js interfaces using Context API for global state management and theme switching, with seamless API integration via Axios
- Integrated Twilio Video SDK (WebRTC) to enable real-time audio/video communication and remote assistance between field users and remote experts

AI-Powered Form Builder (React)

2026 – Present

- Built the React UI from scratch for an AI-powered, CRM-native form builder, replacing generic tools like Google Forms and Typeform with intelligent, CRM-integrated form creation
- Developed interfaces for AI-assisted form generation and post-submission data management, enabling collected responses to automatically map back to CRM records instead of requiring manual data entry

EDUCATION

Bachelor of Technology (B.Tech), Information Technology

2019 – 2023

Karpagam College of Engineering | **CGPA:** 9.40

CERTIFICATIONS

AWS Cloud Practitioner | Amazon Web Services

Feb, 2026

Foundation Level – Software Testing | ISTQB

Mar, 2023

Programming in Java | NPTEL

Oct, 2021
